Summary

Computer Engineering undergraduate with basic knowledge of AI/ML, cloud computing, and full-stack development gained through academic projects and internships. Familiar with Python, Java, C++, HTML, CSS, JavaScript, Flask, and Microsoft Azure. Interested in software development and building practical applications while continuously improving programming, problem-solving, and technical skills.

Experience

Infosys Springboard — *AI/ML Intern* *Feb 2026 – Apr 2026*
Remote

- Developed an Azure-Based Demand Forecasting & Capacity Optimization System using Python,performing data preprocessing, feature engineering, and model evaluation.
- Implemented ARIMA and XGBoost models to forecast future resource demand, evaluated model performance using regression metrics, and supported cloud capacity planning through automated forecasting.

NetLeap IT Training & Solutions — *AI/ML Intern* *Jan 2026 – Feb 2026*
Remote

- Developed a full-stack voice-based coding assistant using Python, Flask, OpenAI Whisper, NLP, HTML, CSS, JavaScript, and Bootstrap, enabling real-time speech-to-code conversion through an interactive web interface.

Skills

Languages: Java, Python, C++, C, JavaScript
Technologies: HTML, CSS, Bootstrap, React, Flask, FastAPI, MySQL
Core: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Problem Solving
Tools: Git, GitHub, VS Code, Jupyter Notebook

Projects

DevFlow AI – AI Project Management System *2026*

- Built a full-stack project management application with JWT authentication, project/task management, CRUD operations, REST APIs, and an AI-powered code explanation feature.

Hands-Off Coding *2025*

- Developed a voice-based coding assistant using OpenAI Whisper and Flask to convert speech into code with NLP-based voice commands for code generation and editing.

Azure-Based Demand Forecasting & Capacity Optimization System (Internship) *2026*

- Performed data preprocessing, feature engineering, and trained ARIMA and XGBoost models to forecast Azure cloud resource demand during the internship.

FocusTrack – Memory Game *2025*

- Built a Simon-style memory game featuring level progression, score tracking, animations, and interactive UI to practice JavaScript game logic, DOM manipulation, and event handling.

Education

Pune Vidyarthi Griha's College of Engineering & S.S. Dhamankar Institute, Nashik
B.E. Computer Engineering *2023 – 2027*
CGPA: **8.6** Sem 5 SGPA: **9.00**

V.D. Dnyandeep Jr. College, Jalna
HSC: 57.33 *2023*

MIT Vishwashanti Gurukul, Ch. Sambhaji Nagar
SSC: 89.60 *2021*

Certifications

Java in Depth – Udemy
AI Primer – Infosys Springboard
AWS Academy Graduate -Cloud Foundations

Leadership & Extracurricular Activities

- Volunteer – College Tech Fest: Assisted in event coordination and technical support.
- Active participant in technical learning and personal software development projects.
