Summary

Computer Engineering undergraduate with proven experience in AI/ML, and full-stack development, including engineering an Azure-based demand forecasting system. Proficient in Python, Java, C++, JavaScript, Flask, and modern web technologies, seeking to build scalable applications and contribute to innovative software development teams

Experience

Infosys Springboard — *AI/ML Intern* *Feb 2026 – Apr 2026*
Remote

- Engineered on Azure-Based Demand Forecasting Capacity Optimization System using Python.
- Implemented ARIMA and XGBoost models to forecast future resource demand, evaluated model performance using regression metrics, and supported cloud capacity planning through automated forecasting.

NetLeap IT Training & Solutions — *AI/ML Intern* *Jan 2026 – Feb 2026*
Remote

- Engineered a full-stack voice-based coding assistant using Python, Flask, OpenAI Whisper, NLP, HTML, CSS, JavaScript, and Bootstrap, enabling real-time speech-to-code conversion and improving coding productivity through an interactive web interface.

Skills

Languages: Java, Python, C++, C, JavaScript
Technologies: HTML, CSS, Bootstrap, React, Flask, FastAPI, MySQL
Core: Data Structures & Algorithms, OOP, DBMS, Computer Ne **Tools**: Git, GitHub, VS Code, Jupyter Notebook

Projects

TrustAgent – Explainable Multi-Agent Decision Intelligence Platform (Group Project) *2026 – Present*

- Developing a runtime trust monitoring and risk assessment platform for multi-agent AI workflows using LangGraph.
- Implementing execution tracing, explainable Trust Scores, risk-level classification, and monitoring dashboards to improve transparency, reliability, and accountability of AI agents.

DevFlow AI – AI Project Management System *2026*

- Built a full-stack project management application with JWT authentication, project/task management, CRUD operations, REST APIs, and an AI-powered code explanation feature.

Hands-Off Coding *2025*

- Developed a voice-based coding assistant using OpenAI Whisper and Flask to convert speech into code, supporting NLP-based voice commands for code generation and editing.

FocusTrack – Memory Game *2025*

- Built a Simon-style memory game featuring level progression, score tracking, animations, and an interactive UI using JavaScript, DOM manipulation, and event handling.

Education

Pune Vidyarthi Griha's College of Engineering & S.S. Dhamankar Institute, Nashik
B.E. Computer Engineering *2023 – 2027*
CGPA: **8.79** Sem 6 SGPA: **9.14**

V.D. Dnyandeep Jr. College, Jalna
HSC: 57.33 *2023*

MIT Vishwashanti Gurukul, Ch. Sambhaji Nagar
SSC: 89.60 *2021*

Certifications

Java in Depth – Udemy
AI Primer – Infosys Springboard
AWS Academy Graduate -Cloud Foundations

Leadership & Extracurricular Activities

- Volunteer – Helped organize 3+ technical workshops, managed event logistics, and supported over 100 attendees during the College Tech Fest.
- Participated in Women Who Master 2026, a national-level all-women hackathon organized by Aspire For Her, collaborating on innovative software solutions.
